

Improper Fraction to Mixed Number

example: $\frac{11}{2}$ \rightarrow Dividend
 2 \rightarrow Divisor

1. Create a division problem
* think of it like a tree in a hurricane.
The top of the tree falls in the house.

$$\frac{11}{2} \rightarrow 2 \overline{)11}$$

2. Divide \rightarrow write the remainder as a fraction

$$\begin{array}{r} 5 \frac{1}{2} \\ 2 \overline{)11} \\ \underline{-10} \\ 1 \end{array}$$
